Telephone

What will the pump do?

02 Pressure, volume and gas load

Chamber volume (litres)

Starting pressure (include units)

Required operating pressure (include units)

Required pump-down time

Pressure reference: absolute or gauge? Where is it measured?

Gases, vapours, dust or droplets present; concentrations if known

Gas flow / vapour load (include units), or describe the process load

Installation and duty

Save the completed PDF and email it to enquiries@girovac.com with any useful drawings.

03 How the pump will be used

Operating hours, cycle frequency and time at each pressure

Cleanliness requirements / oil-free requirement

Existing pump model and the reason for replacing or adding a pump

04 Connections and site conditions

Inlet pipe: internal diameter, length, valves and bends

Electrical supply: voltage / phase / frequency

Cooling and ambient conditions

Exhaust destination, treatment and any pressure restriction

Space, noise, controls, interlocks or other site requirements

Quantity and required date

Please flag hazardous gases or process risks. Final suitability is checked against the selected pump and its operating instructions. This form is an enquiry, not a specification.
